

# HME

## Heat & Moisture Exchangers

world class **performance** in **breathing comfort** safety

Pharma Systems heat and moisture exchangers offer the user a high efficiency solution for breathing systems in a clear housing for easy inspection.

 **Pharma Systems**

# Pharma Systems HME

- Conical fittings in accordance with ISO standard ensures safe connection security.
- Designed to provide heated, humidified gases to the patient
- Lowers the risk of hypothermia and damage to the respiratory tract.
- Eliminates the need for water traps and their maintenance.
- Dry gas prevents sampling tube and analyzers from moisture and lowers the risk for colonization.
- Eliminates the need for active heat and humidification sources.
- Provides high humidification efficiency with all ventilation parameters.
- Offers immediate start of function and stability over time.
- All Pharma Systems HMEs are tested according to ISO 9360.
- Pharma Neo is also available with a unique flexible port for CO<sub>2</sub> testing
- Initial set-up is simple, quick and secure.
- Different options ensure the right choice of device.
- Should be changed every 24 hours or more frequently if resistance increases.

# Bact-Trap™ Hepa HME

world class **performance** in **breathing comfort** safety

Our combined heat and moisture exchangers with bacterial/viral filters offer the user a high efficiency solution for breathing systems in a clear housing for easy inspection.

 Pharma Systems

# Pharma Systems Bact-Trap™ Hepa HME

- Conical fittings in accordance with ISO standard ensures safe connection security.
- Efficient humidification prevents moisture from collecting in the tubing.
- Two HME elements to reduce risk for hypothermia.
- Efficient filters reduce potential colonization into the circuit and equipment.
- Reduces the risk of cross-infection among patients and hospital staff.
- Eliminates the need for heated wire circuits, water traps and their maintenance.
- Dry and filtered gas prevents sampling tube and analyzers from moisture and colonization.
- Initial set-up is simple, quick and secure.
- Different options ensures the right choice of device.
- Should be changed every 24 hours or more frequently if resistance increases.
- A breathing HME filter which is a combination of pleated mechanical filter and electrostatic charge attraction with high efficiency heat and moisture output.
- Designed for optimal patient comfort – smooth and round shape to prevent pressure sores on patient.
- Complies with the highest global filtration standard - ISO 23328.
- >99.9999% effective bacterial/viral filter to prevent the spread of infectious particles into the circuits, machines and manual resuscitators.
- Provides heat & moisture and isolates patients from potential bacterial/viral contamination.

# Pharma Trach

world class **performance** in **breathing comfort** safety

Heat and moisture exchanger for tracheotomized spontaneously breathing patients.

 **Pharma Systems**

# Pharma Systems Pharma Trach

- Provides heated & humidified air to spontaneously breathing patients through a tracheotomy or endotracheal tube.
- Suitable for:
  - Tracheostomized Home Care or ENT patient
  - For all spontaneously breathing tracheostomized patients in respiratory care, including immediate postweaning phase.
- Initial set-up is simple, quick and secure.
- Different options ensure the right choice of device.
- Should be changed every 24 hours or sooner depending on secretions.
- Excellent humidification efficiency.
- Lightweight and low resistance
  - minimal work of breathing.
- Easy to use and cost efficient.
- Several options available,
  - Humidified oxygen supply
  - Self-closing suctioning port
  - Unique exchangeable HME cassettes - cost saving and hygienic.
- Designed for adult and pediatric patients.
- Now available with Universal oxygen connector!
- 20 years of usage worldwide.

## Our Pharma Trach models

**Pharma Trach**

*Intended for tracheotomized spontaneously breathing patients. Recommended for Respiratory care, ENT, Emergency and Home. Pharma Trach is suitable for both adult and children usage. Care.*
